

Q1: A client with heart failure is prescribed furosemide. Which finding requires immediate action?

- ☐ A. Blood pressure 130/80 mmHg
- ☐ B. Potassium 2.9 mEq/L
- ☐ C. Weight loss of 1 lb
- ☐ D. Urine output 1500 mL/day

Q2: A nurse is caring for a client post-myocardial infarction. Which assessment finding indicates pericarditis?

- ☐ A. Bradycardia
- ☐ B. Chest pain relieved by rest
- ☐ C. Pericardial friction rub
- ☐ D. Hypertension

Q3: A client with COPD is receiving oxygen therapy. Which action is appropriate?

- ☐ A. Administer oxygen via non-rebreather mask
- ☐ B. Maintain oxygen flow at 2 L/min
- ☐ C. Encourage high carbohydrate diet
- ☐ D. Position client supine

Q4: Which finding should the nurse expect in a client with pneumothorax?

- ☐ A. Bradycardia
- ☐ B. Dull percussion
- ☐ C. Absent breath sounds
- ☐ D. Bilateral crackles

Q5: A client with peptic ulcer disease reports sudden severe abdominal pain. What is the

priority action?

- ☐ A. Administer antacid
- ☐ B. Assess bowel sounds
- ☐ C. Notify the healthcare provider
- ☐ D. Encourage fluids

Q6: Which dietary choice is best for a client with hepatic encephalopathy?

- ☐ A. High-protein meal
- ☐ B. Low-sodium soup
- ☐ C. Grilled chicken
- ☐ D. Vegetarian diet

Q7: A client with increased intracranial pressure has a new onset of vomiting. What is the nurse's priority action?

- ☐ A. Document and monitor
- ☐ B. Elevate head of bed
- ☐ C. Administer antiemetic
- ☐ D. Encourage oral fluids

Q8: Which finding indicates meningitis in a client?

- ☐ A. Hypotension
- ☐ B. Nuchal rigidity
- ☐ C. Dilated pupils
- ☐ D. Dry mucous membranes

Q9: Which task can the nurse delegate to an unlicensed assistive personnel (UAP)?

- ☐ A. Administer oral medications
- ☐ B. Evaluate client pain
- ☐ C. Obtain vital signs
- ☐

D. Teach deep breathing

Q10: A nurse assigns care to a licensed practical nurse (LPN). Which action by the LPN requires intervention?

- ☐ A. Administering insulin
- ☐ B. Inserting a Foley catheter
- ☐ C. Initiating a blood transfusion
- ☐ D. Documenting I&O

Q11: A client with heart failure is prescribed furosemide. Which finding requires immediate action?

- ☐ A. Blood pressure 130/80 mmHg
- ☐ B. Potassium 2.9 mEq/L
- ☐ C. Weight loss of 1 lb
- ☐ D. Urine output 1500 mL/day

Q12: A nurse is caring for a client post-myocardial infarction. Which assessment finding indicates pericarditis?

- ☐ A. Bradycardia
- ☐ B. Chest pain relieved by rest
- ☐ C. Pericardial friction rub
- ☐ D. Hypertension

Q13: A client with COPD is receiving oxygen therapy. Which action is appropriate?

- ☐ A. Administer oxygen via non-rebreather mask
- ☐ B. Maintain oxygen flow at 2 L/min
- ☐ C. Encourage high carbohydrate diet
- ☐ D. Position client supine

Q14: Which finding should the nurse expect in a client with pneumothorax?

- ☐ A. Bradycardia
- ☐ B. Dull percussion
- ☐ C. Absent breath sounds
- ☐ D. Bilateral crackles

Q15: A client with peptic ulcer disease reports sudden severe abdominal pain. What is the priority action?

- ☐ A. Administer antacid
- ☐ B. Assess bowel sounds
- ☐ C. Notify the healthcare provider
- ☐ D. Encourage fluids

Q16: Which dietary choice is best for a client with hepatic encephalopathy?

- ☐ A. High-protein meal
- ☐ B. Low-sodium soup
- ☐ C. Grilled chicken
- ☐ D. Vegetarian diet

Q17: A client with increased intracranial pressure has a new onset of vomiting. What is the nurse's priority action?

- ☐ A. Document and monitor
- ☐ B. Elevate head of bed
- ☐ C. Administer antiemetic
- ☐ D. Encourage oral fluids

Q18: Which finding indicates meningitis in a client?

- ☐ A. Hypotension
- ☐ B. Nuchal rigidity
- ☐

- ☐ C. Dilated pupils
- ☐ D. Dry mucous membranes

Q19: Which task can the nurse delegate to an unlicensed assistive personnel (UAP)?

- ☐ A. Administer oral medications
- ☐ B. Evaluate client pain
- ☐ C. Obtain vital signs
- ☐ D. Teach deep breathing

Q20: A nurse assigns care to a licensed practical nurse (LPN). Which action by the LPN requires intervention?

- ☐ A. Administering insulin
- ☐ B. Inserting a Foley catheter
- ☐ C. Initiating a blood transfusion
- ☐ D. Documenting I&O

Q21: A client with heart failure is prescribed furosemide. Which finding requires immediate action?

- ☐ A. Blood pressure 130/80 mmHg
- ☐ B. Potassium 2.9 mEq/L
- ☐ C. Weight loss of 1 lb
- ☐ D. Urine output 1500 mL/day

Q22: A nurse is caring for a client post-myocardial infarction. Which assessment finding indicates pericarditis?

- ☐ A. Bradycardia
- ☐ B. Chest pain relieved by rest
- ☐ C. Pericardial friction rub
- ☐ D. Hypertension

Q23: A client with COPD is receiving oxygen therapy. Which action is appropriate?

- ☐ A. Administer oxygen via non-rebreather mask
- ☐ B. Maintain oxygen flow at 2 L/min
- ☐ C. Encourage high carbohydrate diet
- ☐ D. Position client supine

Q24: Which finding should the nurse expect in a client with pneumothorax?

- ☐ A. Bradycardia
- ☐ B. Dull percussion
- ☐ C. Absent breath sounds
- ☐ D. Bilateral crackles

Q25: A client with peptic ulcer disease reports sudden severe abdominal pain. What is the priority action?

- ☐ A. Administer antacid
- ☐ B. Assess bowel sounds
- ☐ C. Notify the healthcare provider
- ☐ D. Encourage fluids

Q26: Which dietary choice is best for a client with hepatic encephalopathy?

- ☐ A. High-protein meal
- ☐ B. Low-sodium soup
- ☐ C. Grilled chicken
- ☐ D. Vegetarian diet

Q27: A client with increased intracranial pressure has a new onset of vomiting. What is the nurse's priority action?

- ☐ A. Document and monitor
- ☐ B. Elevate head of bed
- ☐

- ☐ C. Administer antiemetic
- ☐ D. Encourage oral fluids

Q28: Which finding indicates meningitis in a client?

- ☐ A. Hypotension
- ☐ B. Nuchal rigidity
- ☐ C. Dilated pupils
- ☐ D. Dry mucous membranes

Q29: Which task can the nurse delegate to an unlicensed assistive personnel (UAP)?

- ☐ A. Administer oral medications
- ☐ B. Evaluate client pain
- ☐ C. Obtain vital signs
- ☐ D. Teach deep breathing

Q30: A nurse assigns care to a licensed practical nurse (LPN). Which action by the LPN requires intervention?

- ☐ A. Administering insulin
- ☐ B. Inserting a Foley catheter
- ☐ C. Initiating a blood transfusion
- ☐ D. Documenting I&O

Q31: A client with heart failure is prescribed furosemide. Which finding requires immediate action?

- ☐ A. Blood pressure 130/80 mmHg
- ☐ B. Potassium 2.9 mEq/L
- ☐ C. Weight loss of 1 lb
- ☐ D. Urine output 1500 mL/day

Q32: A nurse is caring for a client post-myocardial infarction. Which assessment finding indicates pericarditis?

- ☐ A. Bradycardia
- ☐ B. Chest pain relieved by rest
- ☐ C. Pericardial friction rub
- ☐ D. Hypertension

Q33: A client with COPD is receiving oxygen therapy. Which action is appropriate?

- ☐ A. Administer oxygen via non-rebreather mask
- ☐ B. Maintain oxygen flow at 2 L/min
- ☐ C. Encourage high carbohydrate diet
- ☐ D. Position client supine

Q34: Which finding should the nurse expect in a client with pneumothorax?

- ☐ A. Bradycardia
- ☐ B. Dull percussion
- ☐ C. Absent breath sounds
- ☐ D. Bilateral crackles

Q35: A client with peptic ulcer disease reports sudden severe abdominal pain. What is the priority action?

- ☐ A. Administer antacid
- ☐ B. Assess bowel sounds
- ☐ C. Notify the healthcare provider
- ☐ D. Encourage fluids

Q36: Which dietary choice is best for a client with hepatic encephalopathy?

- ☐ A. High-protein meal
- ☐ B. Low-sodium soup
- ☐

- ☐ C. Grilled chicken
- ☐ D. Vegetarian diet

Q37: A client with increased intracranial pressure has a new onset of vomiting. What is the nurse's priority action?

- ☐ A. Document and monitor
- ☐ B. Elevate head of bed
- ☐ C. Administer antiemetic
- ☐ D. Encourage oral fluids

Q38: Which finding indicates meningitis in a client?

- ☐ A. Hypotension
- ☐ B. Nuchal rigidity
- ☐ C. Dilated pupils
- ☐ D. Dry mucous membranes

Q39: Which task can the nurse delegate to an unlicensed assistive personnel (UAP)?

- ☐ A. Administer oral medications
- ☐ B. Evaluate client pain
- ☐ C. Obtain vital signs
- ☐ D. Teach deep breathing

Q40: A nurse assigns care to a licensed practical nurse (LPN). Which action by the LPN requires intervention?

- ☐ A. Administering insulin
- ☐ B. Inserting a Foley catheter
- ☐ C. Initiating a blood transfusion
- ☐ D. Documenting I&O

Q41: A client with heart failure is prescribed furosemide. Which finding requires immediate action?

- ☐ A. Blood pressure 130/80 mmHg
- ☐ B. Potassium 2.9 mEq/L
- ☐ C. Weight loss of 1 lb
- ☐ D. Urine output 1500 mL/day

Q42: A nurse is caring for a client post-myocardial infarction. Which assessment finding indicates pericarditis?

- ☐ A. Bradycardia
- ☐ B. Chest pain relieved by rest
- ☐ C. Pericardial friction rub
- ☐ D. Hypertension

Q43: A client with COPD is receiving oxygen therapy. Which action is appropriate?

- ☐ A. Administer oxygen via non-rebreather mask
- ☐ B. Maintain oxygen flow at 2 L/min
- ☐ C. Encourage high carbohydrate diet
- ☐ D. Position client supine

Q44: Which finding should the nurse expect in a client with pneumothorax?

- ☐ A. Bradycardia
- ☐ B. Dull percussion
- ☐ C. Absent breath sounds
- ☐ D. Bilateral crackles

Q45: A client with peptic ulcer disease reports sudden severe abdominal pain. What is the priority action?

- ☐ A. Administer antacid
- ☐

- ☐ B. Assess bowel sounds
- ☐ C. Notify the healthcare provider
- ☐ D. Encourage fluids

Q46: Which dietary choice is best for a client with hepatic encephalopathy?

- ☐ A. High-protein meal
- ☐ B. Low-sodium soup
- ☐ C. Grilled chicken
- ☐ D. Vegetarian diet

Q47: A client with increased intracranial pressure has a new onset of vomiting. What is the nurse's priority action?

- ☐ A. Document and monitor
- ☐ B. Elevate head of bed
- ☐ C. Administer antiemetic
- ☐ D. Encourage oral fluids

Q48: Which finding indicates meningitis in a client?

- ☐ A. Hypotension
- ☐ B. Nuchal rigidity
- ☐ C. Dilated pupils
- ☐ D. Dry mucous membranes

Q49: Which task can the nurse delegate to an unlicensed assistive personnel (UAP)?

- ☐ A. Administer oral medications
- ☐ B. Evaluate client pain
- ☐ C. Obtain vital signs
- ☐ D. Teach deep breathing

Q50: A nurse assigns care to a licensed practical nurse (LPN). Which action by the LPN requires intervention?

- ☐ A. Administering insulin
- ☐ B. Inserting a Foley catheter
- ☐ C. Initiating a blood transfusion
- ☐ D. Documenting I&O

Q51: A client with heart failure is prescribed furosemide. Which finding requires immediate action?

- ☐ A. Blood pressure 130/80 mmHg
- ☐ B. Potassium 2.9 mEq/L
- ☐ C. Weight loss of 1 lb
- ☐ D. Urine output 1500 mL/day

Q52: A nurse is caring for a client post-myocardial infarction. Which assessment finding indicates pericarditis?

- ☐ A. Bradycardia
- ☐ B. Chest pain relieved by rest
- ☐ C. Pericardial friction rub
- ☐ D. Hypertension

Q53: A client with COPD is receiving oxygen therapy. Which action is appropriate?

- ☐ A. Administer oxygen via non-rebreather mask
- ☐ B. Maintain oxygen flow at 2 L/min
- ☐ C. Encourage high carbohydrate diet
- ☐ D. Position client supine

Q54: Which finding should the nurse expect in a client with pneumothorax?

- ☐ A. Bradycardia
- ☐

- ☐ B. Dull percussion
- ☐ C. Absent breath sounds
- ☐ D. Bilateral crackles

Q55: A client with peptic ulcer disease reports sudden severe abdominal pain. What is the priority action?

- ☐ A. Administer antacid
- ☐ B. Assess bowel sounds
- ☐ C. Notify the healthcare provider
- ☐ D. Encourage fluids

Q56: Which dietary choice is best for a client with hepatic encephalopathy?

- ☐ A. High-protein meal
- ☐ B. Low-sodium soup
- ☐ C. Grilled chicken
- ☐ D. Vegetarian diet

Q57: A client with increased intracranial pressure has a new onset of vomiting. What is the nurse's priority action?

- ☐ A. Document and monitor
- ☐ B. Elevate head of bed
- ☐ C. Administer antiemetic
- ☐ D. Encourage oral fluids

Q58: Which finding indicates meningitis in a client?

- ☐ A. Hypotension
- ☐ B. Nuchal rigidity
- ☐ C. Dilated pupils
- ☐ D. Dry mucous membranes

Q59: Which task can the nurse delegate to an unlicensed assistive personnel (UAP)?

- ☐ A. Administer oral medications
- ☐ B. Evaluate client pain
- ☐ C. Obtain vital signs
- ☐ D. Teach deep breathing

Q60: A nurse assigns care to a licensed practical nurse (LPN). Which action by the LPN requires intervention?

- ☐ A. Administering insulin
- ☐ B. Inserting a Foley catheter
- ☐ C. Initiating a blood transfusion
- ☐ D. Documenting I&O

Q61: A client with heart failure is prescribed furosemide. Which finding requires immediate action?

- ☐ A. Blood pressure 130/80 mmHg
- ☐ B. Potassium 2.9 mEq/L
- ☐ C. Weight loss of 1 lb
- ☐ D. Urine output 1500 mL/day

Q62: A nurse is caring for a client post-myocardial infarction. Which assessment finding indicates pericarditis?

- ☐ A. Bradycardia
- ☐ B. Chest pain relieved by rest
- ☐ C. Pericardial friction rub
- ☐ D. Hypertension

Q63: A client with COPD is receiving oxygen therapy. Which action is appropriate?

- ☐ A. Administer oxygen via non-rebreather mask
- ☐

- ☐ B. Maintain oxygen flow at 2 L/min
- ☐ C. Encourage high carbohydrate diet
- ☐ D. Position client supine

Q64: Which finding should the nurse expect in a client with pneumothorax?

- ☐ A. Bradycardia
- ☐ B. Dull percussion
- ☐ C. Absent breath sounds
- ☐ D. Bilateral crackles

Q65: A client with peptic ulcer disease reports sudden severe abdominal pain. What is the priority action?

- ☐ A. Administer antacid
- ☐ B. Assess bowel sounds
- ☐ C. Notify the healthcare provider
- ☐ D. Encourage fluids

Q66: Which dietary choice is best for a client with hepatic encephalopathy?

- ☐ A. High-protein meal
- ☐ B. Low-sodium soup
- ☐ C. Grilled chicken
- ☐ D. Vegetarian diet

Q67: A client with increased intracranial pressure has a new onset of vomiting. What is the nurse's priority action?

- ☐ A. Document and monitor
- ☐ B. Elevate head of bed
- ☐ C. Administer antiemetic
- ☐ D. Encourage oral fluids

Q68: Which finding indicates meningitis in a client?

- ☐ A. Hypotension
- ☐ B. Nuchal rigidity
- ☐ C. Dilated pupils
- ☐ D. Dry mucous membranes

Q69: Which task can the nurse delegate to an unlicensed assistive personnel (UAP)?

- ☐ A. Administer oral medications
- ☐ B. Evaluate client pain
- ☐ C. Obtain vital signs
- ☐ D. Teach deep breathing

Q70: A nurse assigns care to a licensed practical nurse (LPN). Which action by the LPN requires intervention?

- ☐ A. Administering insulin
- ☐ B. Inserting a Foley catheter
- ☐ C. Initiating a blood transfusion
- ☐ D. Documenting I&O

Q71: A client with heart failure is prescribed furosemide. Which finding requires immediate action?

- ☐ A. Blood pressure 130/80 mmHg
- ☐ B. Potassium 2.9 mEq/L
- ☐ C. Weight loss of 1 lb
- ☐ D. Urine output 1500 mL/day

Q72: A nurse is caring for a client post-myocardial infarction. Which assessment finding indicates pericarditis?

- ☐ A. Bradycardia
- ☐

- ☐ B. Chest pain relieved by rest
- ☐ C. Pericardial friction rub
- ☐ D. Hypertension

Q73: A client with COPD is receiving oxygen therapy. Which action is appropriate?

- ☐ A. Administer oxygen via non-rebreather mask
- ☐ B. Maintain oxygen flow at 2 L/min
- ☐ C. Encourage high carbohydrate diet
- ☐ D. Position client supine

Q74: Which finding should the nurse expect in a client with pneumothorax?

- ☐ A. Bradycardia
- ☐ B. Dull percussion
- ☐ C. Absent breath sounds
- ☐ D. Bilateral crackles

Q75: A client with peptic ulcer disease reports sudden severe abdominal pain. What is the priority action?

- ☐ A. Administer antacid
- ☐ B. Assess bowel sounds
- ☐ C. Notify the healthcare provider
- ☐ D. Encourage fluids

Q76: Which dietary choice is best for a client with hepatic encephalopathy?

- ☐ A. High-protein meal
- ☐ B. Low-sodium soup
- ☐ C. Grilled chicken
- ☐ D. Vegetarian diet

Q77: A client with increased intracranial pressure has a new onset of vomiting. What is the nurse's priority action?

- ☐ A. Document and monitor
- ☐ B. Elevate head of bed
- ☐ C. Administer antiemetic
- ☐ D. Encourage oral fluids

Q78: Which finding indicates meningitis in a client?

- ☐ A. Hypotension
- ☐ B. Nuchal rigidity
- ☐ C. Dilated pupils
- ☐ D. Dry mucous membranes

Q79: Which task can the nurse delegate to an unlicensed assistive personnel (UAP)?

- ☐ A. Administer oral medications
- ☐ B. Evaluate client pain
- ☐ C. Obtain vital signs
- ☐ D. Teach deep breathing

Q80: A nurse assigns care to a licensed practical nurse (LPN). Which action by the LPN requires intervention?

- ☐ A. Administering insulin
- ☐ B. Inserting a Foley catheter
- ☐ C. Initiating a blood transfusion
- ☐ D. Documenting I&O

Q81: A client with heart failure is prescribed furosemide. Which finding requires immediate action?

- ☐ A. Blood pressure 130/80 mmHg
- ☐

- ☐ B. Potassium 2.9 mEq/L
- ☐ C. Weight loss of 1 lb
- ☐ D. Urine output 1500 mL/day

Q82: A nurse is caring for a client post-myocardial infarction. Which assessment finding indicates pericarditis?

- ☐ A. Bradycardia
- ☐ B. Chest pain relieved by rest
- ☐ C. Pericardial friction rub
- ☐ D. Hypertension

Q83: A client with COPD is receiving oxygen therapy. Which action is appropriate?

- ☐ A. Administer oxygen via non-rebreather mask
- ☐ B. Maintain oxygen flow at 2 L/min
- ☐ C. Encourage high carbohydrate diet
- ☐ D. Position client supine

Q84: Which finding should the nurse expect in a client with pneumothorax?

- ☐ A. Bradycardia
- ☐ B. Dull percussion
- ☐ C. Absent breath sounds
- ☐ D. Bilateral crackles

Q85: A client with peptic ulcer disease reports sudden severe abdominal pain. What is the priority action?

- ☐ A. Administer antacid
- ☐ B. Assess bowel sounds
- ☐ C. Notify the healthcare provider
- ☐ D. Encourage fluids
